## PROJECT

---

Study on Working Capital Management of Cisco Constructions

November 2022 – December 2022

- Conducted a detailed analysis of working capital management practices at CISCONS Constructions Pvt. Ltd. using data collection from NSIC.
- Identified inefficiencies in liquidity management, recommending actions to optimize cash flow and reduce working capital requirements by 15%.
- Evaluated key financial metrics, including current ratio, quick ratio, inventory turnover, and accounts receivable turnover, providing quantifiable insights.
- Streamlined financial processes, resulting in a 10% improvement in the operational cycle and reduction in accounts receivable days.
- Delivered actionable recommendations to enhance working capital utilization and align liquidity with industry standards, improving overall financial health.
